Morse Watchman's SmartKey Reader

- Integrated into TrueTouch, a new "wizard" style interface allows for keys to be rapidly added (and named!), identified, and deleted.
- Can be used on any PC with TrueTouch V1.7 or higher installed.
- For Auto KeyBank Touch systems, keys can have additional information added at the moment it is being added, such as year, make, model, and color.
- Stable design allows keys to be inserted and removed with ease.
- Utilizes a USB connection for easy installation and use – Plug it in to use it, unplug when not in use, or leave plugged in all the time!
- Compatible with KeyWatcher Touch – V1.7.0 and higher!

PC Requirements:
- ✓ 32 or 64 bit processor
- ✓ Windows Vista or higher
- ✓ (1) USB A port available
- ✓ No hard drive or memory requirements
